Paging System and Nurse Call

buzz at the station, requiring a staffer to actually visit the patient’s room to determine the patient’s needs.

The call button provides the following benefits to patients:

- Enables a patient who is confined to bed and has no other way of communicating with staff to alert a nurse of the need for any type of assistance
- Enables a patient who is able to get out of bed, but for whom this may be hazardous, exhausting, or otherwise difficult to alert a nurse of the need for any type of assistance
- Provides the patient an increased sense of security

The call button can also be used by a health care staff member already with the patient to call for another when such assistance is needed, or by visitors to call for help on behalf of the patient.

Paging System

Office buildings, commercial establishments, stadiums, theaters, train stations, airports, theme parks, schools and hospitals are just a few verticals that benefit from paging system.

Paging System is a public address, or loudspeaker system used to make announcements and notify or summon people. In large buildings, paging systems commonly are divided into a number of zones, or coverage areas. Key telephone systems (KTSs) commonly feature voice-over paging, which allows an authorized user to page through the intercom system, which works through the speakers built into the telephone sets.

Different types of Speakers:

BULACAN MEDICAL MISSION GROUP HEALTH SERVICES COOPERATIVE (BMMG) is among the first to benefit from this technology. Wall-mounted intercom stations are designed for hands-free operation, enabling hospital staff to quickly and efficiently communicate with patients.

A nurse call button is a button found around a hospital bed that allows patients to alert a nurse or other health care staff member remotely of their need for help. When the button is pressed, a signal alerts staff at the nurse’s station, and usually, a nurse or nurse assistant responds to such a call. Some systems also allow the patient to speak directly to the staffer; others simply beep or

Nurse Call is the newest addition to the array of tech solutions that Circuit Solutions Inc. (CSI) provide to hospitals. The
